## Santech Trading Co. — Website Technical Handover Document

وثيقة تسليم البنية التحتية التقنية لموقع شركة سانتك للتجارة

Version: 1.0

Date: April 2026

Live Site: <https://santech-website.pages.dev>

Repository: [https://github.com/Ammaraliwi/santech\\_website](https://github.com/Ammaraliwi/santech_website)

### 1. High-Level Architecture | البنية المعمارية العامة

### 2. Technology Stack | المكس التقني

| Layer              | Technology               | Purpose                                      | Cost               |
|--------------------|--------------------------|----------------------------------------------|--------------------|
| Frontend Framework | React 18 + TypeScript    | UI library + type safety                     | Free (open source) |
| Build Tool         | Vite 5                   | Fast dev server + optimized production build | Free               |
| Styling            | Tailwind CSS + shadcn/ui | Utility-first CSS + component library        | Free               |

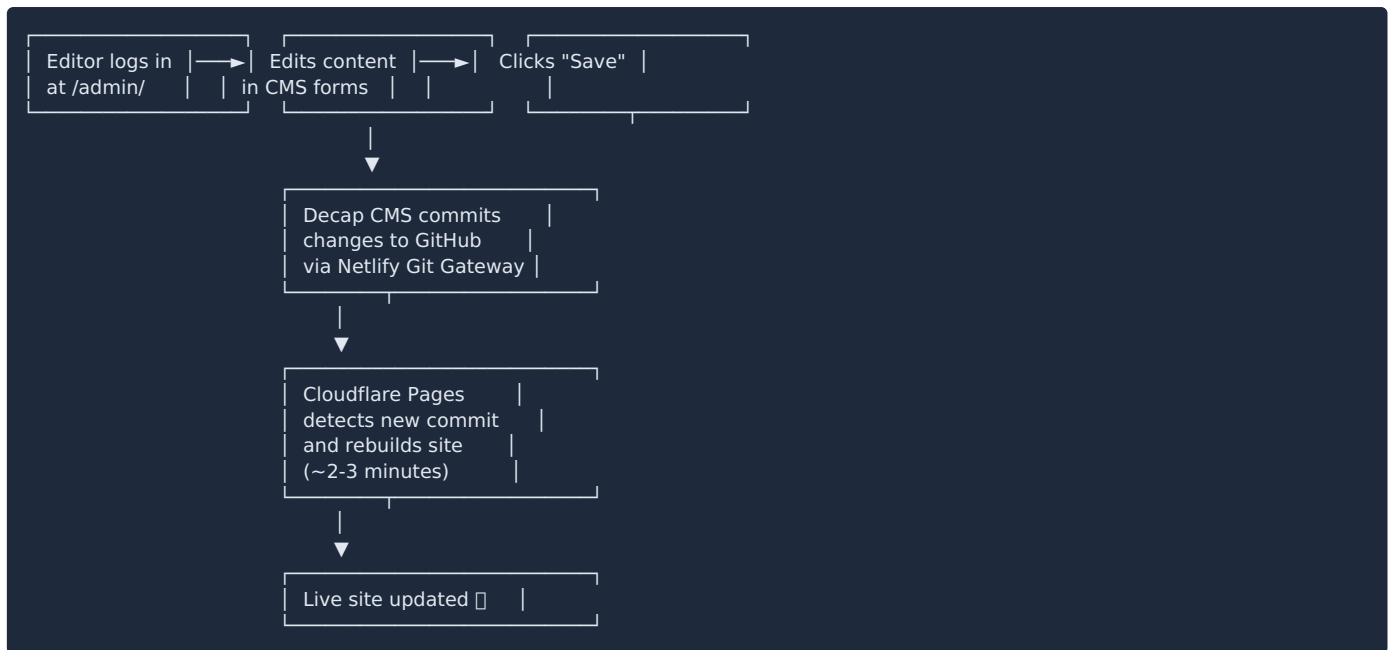

| Layer                | Technology                                  | Purpose                                              | Cost                              |
|----------------------|---------------------------------------------|------------------------------------------------------|-----------------------------------|
| Animation            | Framer Motion                               | Smooth scroll/entrance animations                    | Free                              |
| Internationalization | Custom i18n (en.json / ar.json)             | Bilingual EN/AR with RTL support                     | Free                              |
| Icons                | Lucide React                                | Modern icon set                                      | Free                              |
| Hosting / CDN        | Cloudflare Pages                            | Static site hosting + global CDN                     | <b>Free</b> (unlimited bandwidth) |
| Source Control       | GitHub                                      | Version control + auto-deploy trigger                | Free (public repo)                |
| CMS                  | Decap CMS (open source)                     | Browser-based content editor at <code>/admin/</code> | Free (self-hosted)                |
| Authentication       | Netlify Identity + Git Gateway              | Login for content editors                            | <b>Free</b> tier (up to 5 users)  |
| Domain (current)     | <code>*.pages.dev</code> (Cloudflare)       | Free subdomain                                       | Free                              |
| Domain (optional)    | Custom (e.g. <code>santech-srl.com</code> ) | To be added by Cloudflare DNS                        | Annual domain cost only           |

📌 **Total monthly cost: \$0** (with free domain). With custom domain:  $\approx$  \$10-15/year.

### 3. Repository Structure | هيكل المستودع

```

### 4. Content Update Flow | آلية تحديث المحتوى

**No technical knowledge required.** Editors only see form fields and image-upload buttons.

## 5. Access Credentials Checklist | قائمة الصلاحيات للتسليم

| Service                 | URL                                               | Account Owner        | Access Type      |
|-------------------------|---------------------------------------------------|----------------------|------------------|
| <b>GitHub</b>           | github.com/Ammaraliwi/santech_website             | Ammaraliwi           | Repository owner |
| <b>Cloudflare Pages</b> | dash.cloudflare.com                               | Client account       | Build & deploy   |
| <b>Netlify Identity</b> | app.netlify.com/projects/sensational-halva-03159a | Client account       | Identity admin   |
| <b>CMS Login</b>        | https://santech-website.pages.dev/admin/          | amar-209@hotmail.com | Content editor   |

### Handover Checklist

- ☐ Transfer GitHub repository ownership (or add client as admin)
- ☐ Transfer Cloudflare Pages project to client account
- ☐ Transfer Netlify project to client account
- ☐ Provide CMS login credentials to content team
- ☐ Document any custom domain DNS settings
- ☐ Schedule a 30-min CMS training session for editors

## 6. What Editors Can Edit (No Code Needed)

The CMS at </admin/> exposes **3 collections**:

### Site Settings

- **Brand:** Logo image (upload from device), alt text
- **Contact:** Phone numbers (add/remove), emails (add/remove), GM email, WhatsApp number, Google Maps link, embedded map URL
- **Images:** Hero background, About background, Showroom photo, Social-share image (Open Graph)

### English Site Content

281 editable text strings, organized into 22 collapsible sections (Hero, About, Services, Industries, Process, Projects, Testimonials, Leadership, Certifications, Catalog, Showroom, Contact, Footer, etc.)

## المحتوى العربي

Mirror of English collection — every English string has its Arabic counterpart.

## 7. Developer Workflow | سير عمل المطور

### Local Development

```
git clone https://github.com/Ammaraliwi/santech_website.git
cd santech_website
pnpm install
pnpm --filter @workspace/santech-website run dev
# Site runs at http://localhost:5173
```

### Production Deploy (automatic)

Every push to `main` triggers Cloudflare Pages to: 1. Run `pnpm install` 2. Run `pnpm --filter @workspace/santech-website run build` 3. Deploy `dist/` folder to global CDN

### Adding a New Editable Field

- 1. Add the field to `src/content/settings.json` (or `en.json` / `ar.json` )
- 2. Re-generate `public/admin/config.yml` (script in repo)
- 3. Reference the field in the relevant React component
- 4. Commit & push — CMS updates automatically

## 8. Performance & SEO

| Metric            | Implementation                                                      |
|-------------------|---------------------------------------------------------------------|
| Hosting           | Cloudflare global CDN (300+ edge locations)                         |
| SSL/HTTPS         | Auto-provisioned by Cloudflare                                      |
| Compression       | Brotli + Gzip (automatic)                                           |
| Caching           | Static assets cached at edge                                        |
| Bundle Size       | Code-split per route, lazy-loaded sections                          |
| Lighthouse Target | 90+ Performance, 100 Accessibility                                  |
| Languages         | EN/AR with <code>lang</code> + <code>dir</code> HTML attributes     |
| Meta Tags         | Title, description, OG image (editable in <code>index.html</code> ) |
| Mobile            | Fully responsive (Tailwind breakpoints)                             |

## 9. Support & Maintenance | الدعم والصيانة

### Common Tasks

| Task                     | Owner                  | Frequency  |
|--------------------------|------------------------|------------|
| Update site text/images  | Content Team (via CMS) | As needed  |
| Add new content sections | Developer              | On request |

| Task                            | Owner                           | Frequency              |
|---------------------------------|---------------------------------|------------------------|
| Update brand identity           | Content Team (via CMS Settings) | Rare                   |
| Security updates (npm packages) | Developer                       | Quarterly              |
| Backup verification             | Developer                       | Monthly (auto via Git) |

Backup Strategy

- **Code & Content:** Every change is a Git commit — full history preserved forever in GitHub
  - **Images:** Stored in Git LFS-friendly `public/images/uploads/` folder
  - **Database:** None required (static site)
  - **Restore Time:** Any previous version can be restored in <5 minutes via `git revert`
- 

10. Key Contacts

| Role           | Name             | Email                      |
|----------------|------------------|----------------------------|
| Project Owner  | Dr. A. Wasil     | dr.a.wasil@santech-srl.com |
| Main Office    | —                | info@santech-srl.com       |
| Sales          | —                | sales@santech-srl.com      |
| Technical Lead | (To be assigned) | —                          |

---

11. License & Ownership

- **Source Code:** Property of Santech Trading Co.
  - **Third-Party Libraries:** All MIT/Apache licensed (free for commercial use)
  - **Images:** Property of Santech Trading Co. (uploaded via CMS)
  - **CMS Software:** Decap CMS (MIT licensed)
