Caroigiani

Electronic Pasteurizers for Gelato Mixes
Pasteurization is a thermal treatment discovered by the scientist Louis Pasteur that kills microbial pathogens in food while maintaining nutritional value and taste. It helps also in the process of mixing and homogenizing the mixutre.

Carpigiani

Electronic Aging Vats for Gelato Mixes
After pasteurization, the mixutre is transferred to aging vats, the Age XPL, where it is stored and aged at 4°C, safe from bacterial contamination.

Carpigiani

Batch Freezers for Artisanal Gelato
The Labo XPL P are batch freezers that are easy to use, simple to manage, and useful in any gelato production area.
